

READ THIS BEFORE YOU START!

Midwest Grow Kits

- ▶ Please download and read the guides before you start.
- ▶ Please read our Q&A section on our website for spore related questions.
- ▶ Jars and spawn bags are best when used right away.
- ▶ Use within 4-5 weeks and store in a cool, dark place
- ▶ Jar lids occasionally can loosen in shipping. Remove bubble wrap, check each lid and re-tighten when needed. Leave the foil on during this step.
- ▶ The foil on the Jars may develop dark rings on top during sterilization.

All our growing and kit setup guides are located here:
